PROFILE

"Do something that actually helps someone, because at the end of the day, is not about the code."

Senior Engineer with over 8 years of experience in software development and management, focused on delivering meaningful solutions that make a real impact for users. Skilled in PHP, WordPress, and JavaScript, with a strong ability to solve complex problems under pressure. A forward-thinking approach drives me to take on new challenges and collaborate with diverse teams to apply innovative technologies and improve processes. I'm committed to creating applications that deliver great user experiences while continually learning and exploring new cultural and technological horizons.
